

## 998GT-A Complete Engines

### MY2014 Ford 4.0L 6 Cylinder DOHC 998GT-A Series Complete Engine Packages

If you want your ride to stand out from the V8 crowd, then maybe a custom built Atomic DOHC 6 cylinder turbocharged engine might just be for you. Designed specifically for the high performance street enthusiast who is looking for excellent value for his performance dollar, all motors are custom built to suit your exact requirements.

Based on our rugged 998GT-A platform, our complete engines can be configured to provide a power level from 700KW (935HP) up to 998KW (1335HP). And our complete engines are just that; complete and ready to run and come with the following:

- Atomic 998GT-A Long engine - sump to rocker cover
- Garrett/Precision/Borg Warner turbo matched to your requirements
- Hi-flow 60mm waste gate
- Atomic merge cone turbo exhaust manifold
- Atomic Viper intake manifold and throttle body
- High efficiency intercooler
- Complete fuel system including Bosch pump(s) and matched injectors
- Atomic/EMS computer including full data logging
- Starter motor
- Water pump
- All pulleys
- Flexplate
- Run in, Dyno tuned and all power/torque graphs

Plus you also have the option of a front or rear sump... the choice is yours!

Atomic engines and components are engineered, dynoed, track tested and fully warranted to give you confidence you won't be let down in the heat of competition.
