

External Belt Drive Systems

External Belt Drive Systems

Atomic now have available external belt drive kits to suit the Ford DOHC 6 cyl engine. This drive kit can be used to drive external oil pumps or mechanical fuel pumps. It bolts directly to Atomic **#306100** or **#306100-UD** balancers.

And to make setting up a mechanical fuel pump even easier, we also produce a billet alloy fuel pump mounting bracket which is designed to accommodate Aeromotive belt drive mechanical fuel pumps - part **#11105** or **#11115**.

#306243 - Mechanical fuel pump drive kit

Mandrel/hub assembly, 14T crank sprocket and 28T pump pulley - does not include pump. To be used in conjunction with **#306245** bracket.

#306244 - Mandrel/drive hub and retaining flange only

For use with dry sump or mechanical fuel pumps.

#306245 - Billet fuel pump mounting bracket suit Aeromotive mechanical fuel pumps

Pump or drive kit not included.
